

## WellSteer Products and Services

Reservoir Studies, Training, Engineering Consulting, Drilling & Fishing Tools Rental Services

As an indigenous company, WellSteer services and solutions combine local expertise, best practices, safe and environmentally sound interpretation operations, innovative technologies aimed at helping its customers increase oilfield efficiency, lower finding and producing cost, improve productivity, maximize reserves recovery, and increase asset value.

Today WellSteer Oilfield Services Limited has technical partnerships with Baker Hughes, Weatherford Nigeria Limited and Phillips Project Center (PPC). WellSteer solutions are aimed at enhancing E&P operations to improve production, increase reserves, drill better wells and operate process facilities. As the industry's focus is moving towards maximizing post-plateau production and ultimate recovery, oil companies have to face more and more resource intensive projects.

### Integrated Reservoir Services

WellSteer offers a wide range of services to provide a reliable processing, interpretation, an integration of all types of E&P data, maximizing the value of the data and allowing our customers to make better-informed operational decisions.

### Office Facility – Interpretation Section

### Office Facility – Interpretation Section

### NGC Process Equipment Maintenance

With our fully equipped modern interpretation center in Benin-City and range of software, WellSteer offers a wide range of services from highly-focused single-well investigations to fully integrated field studies and development planning, including project economics and risk assessment leading to profitable decisions.

### Key services

- Field development studies
- Reservoir characterization and geophysical interpretation
- Drilling engineering services
- Reservoir engineering services
- Interpretation /petrophysical studies
- Production engineering and artificial lift analysis
- Production Optimization
- Geomechanics: pore-pressure prediction, wellbore stability, and production studies
- Production Enhancement and Intervention
- Production forecasting and economics analysis
- Reservoir simulation Services
- Regional studies
- Integrated field studies
- Project Management Services
- Engineering Consulting Services

## Facility Engineering and Project Management

WellSteer engineering specializes in resolving the challenges our clients face in managing and operating their existing facilities. Our engineering staff offers engineering solutions services in oil and gas exploration and production processes.

### Key services

- Facility engineering
- Reservoir management
- Production engineering
- Flow assurance engineering

Capitalizing on the engineering expertise of WellSteer Oilfield Technology Services Limited, the success of every prospect depends as much on an operator's ability to move oil and gas to market as it does on getting the product out of the ground. In many regions, pipelines offer the most economical and dependable means of transporting hydrocarbons from wellhead to refinery. Pipeline companies go to great lengths to safely install and operate their transmission systems. Product chemistry largely dictates metallurgy, while pipeline length and depth gradients dictate operating pressures and flow rates. These design considerations have a direct bearing on operation and maintenance practices. WellSteer Oilfield Technology Services Limited provides a broad overview of offshore pipeline construction design, operations and monitoring activities:

- Pipeline design consideration
- Operations and maintenance
- Monitoring at the speed of light
- Oil and Gas process facility design
- Project management

## Manpower supply, technical training and personnel development

Training and development is the key to any business success and profitability, with ever changing and advancement in the technology in the production of oil and gas, the industry is constantly sourcing for new and better ways. At WellSteer we provide different technical training programs to train and develop professionals in the areas of oil and gas drilling, evaluation and production, keeping them informed with the latest technology and cost effective ways of optimizing reserves and assets.

### Key services

- Manpower supply for E&P
- Log interpretation training
- Customize professional courses spanning E&P operations
- Management and personnel development
- Mentoring scheme
- Open course seminar spanning E&P

## Production Facility Service

## 2942: WELLSTEER OILFIELD TECH.SERV. LIMITED

Product Code Summary

The Supplier has been pre-qualified for the following Products and Services:

Product Code	Product Description	NJQS Status	Offshore Category	Onshore Category
31200	PETROLEUM TECHNOLOGY SERVICES	Pre-Qualified Via Audit		
31208	Petrophysical Interpretation Services	Pre-Qualified Via Audit		
31209	Geological Evaluation Services	Pre-Qualified Via Audit		
31210	Reservoir Evaluation	Pre-Qualified Via Audit		
31299	Other Petroleum Technology Services	Pre-Qualified Via Audit		
39913	Training Courses / Seminars	Pre-Qualified Via Audit		
39918	Manpower Supply, Temporary Staff Hiring - Technical	Pre-Qualified Via Audit		
40501	Project Mngmnt & Provision of all Facilities Engineering, Modifict'n & Maintenance Services for a Site / Platform	Pre-Qualified Via Audit		
40507	Project Management and Provision of all Facilities Engineering Design and FEED at allLocation / Platform	Pre-Qualified Via Audit		

Certificate Number: 140294212209

Issue Date: Jul 14 2010 12:00AM
